

# MALARIA A Poison Breathed into the System

The air arising from low, marshy places, damp cellars, stagnant ponds and pools, and from decaying vegetable matter, as well as the gases from sewers, is loaded with germs of malarial poison. The water we drink, that has not been properly filtered and purified, is also full of these germs and microbes, and as we daily breathe and drink millions of these into the system, to be absorbed by the blood, the entire body begins to feel the effects of the poison. The most common form of Malaria is "chills and fever," but when the blood is thoroughly saturated with the poison it becomes so weak and polluted that abscesses, carbuncles, boils, sores, ulcers and other skin diseases result. Malaria also affects the liver, kidneys, bowels and stomach, producing a chronic state of biliousness that often results in jaundice or some malignant fever. In cases of Malaria the blood must be purified before the body can regain its natural health. S. S. S. contains purifying and tonic properties possessed by no other blood medicine, and is the ideal remedy for the treatment of Malaria. It destroys the germs of the disease and builds up the weakened, polluted circulation. It enters into the blood and forces out every particle of poison and waste matter and adds strength and activity to it. S. S. S. improves the appetite and digestion, tones up the entire system by its alterative and purifying action, and Malaria, with all its bad effects, is permanently driven from the system. Book on the blood and any medical advice, without charge. **THE SWIFT SPECIFIC CO., ATLANTA, GA.**
